The V-RAM Control Packages

V-RAM offers a variety of control packages to meet your application needs. From a simple air switching system that requires no electricity to a PLC system specifically programmed and integrated to your application.

The PLC systems can be intergraded with remote access capabilities so V-RAM technicians can analyze your system and assist with any changes needed for your system's reliability and future expansion. No on-site service technician needed.

All electrical control packages can be UL certified.
